Accessing Databases

To access licensed library resources (databases) you will need to authenticate or identify yourself as a NorQuest student or employee.

There are 2 ways to authenticate; you only need to do one.

LIBRARY LOGIN FOR STUDENTS:
Enter your student id # in the first box and your last name (lowercase letters only) in the second box. Use this method if you have never logged into a computer on campus.

NETWORK LOGIN FOR STUDENTS:
To use this option you need to have logged into an on-campus computer at least once and have changed your ‘password.’ Log in exactly as you would in a NorQuest computer lab.

These are NOT your MyMail or MyQuest logins.

The session may time out on you after 30 minutes. If it does, simply sign in again. There is no limit on the number of databases you can access.
