Academic Integrity Statement Set up for Moodle

1. Here is an example of how an exam integrity statement can be set up in Moodle using the Moodle Choice feature. The actual exam can be kept hidden and the student first goes to the Moodle Final Exam page with the question mark.

2. After clicking on the Final Exam with the question mark, the student will see the following.
When they click “Accept the Agreement,” they can then proceed to the exam by clicking on the button in the bottom right (Proceed to Final Exam).

How to set this up

1. In Moodle, turn on editing and click on +Add an activity or resource
2. Select **Choice** in the **Add an activity** menu.
3. Fill out the **Choice name** field; for example, “Final Exam – Click Here First” or “The Agreement”, whatever you decide to call it. On the same page under **description** add the integrity statement.
4. Scroll down to the **Options** section. In the Option 1 box enter Accept the Agreement (or whatever statement you want students to click on to show they have read the integrity statement).
5. Scroll down to the **Activity completion** section. Click on the arrows in the **Completion tracking** field and select the third statement from the drop down menu:
6. In the same section be sure to **remove** the first checkmark.

7. Save and return to the course
8. Then go to the exam/quiz you want students to write and select edit settings.

9. Go to the **Restrict access** section and click on **Add restriction**.
10. Choose **Activity Completion**.
11. Choose the name you gave to the Choice Activity; for example, Final Exam – Click Here First and “must be marked comp.”
12. Scroll down to the Activity completion section and select the following options in Completion tracking and Require view.

13. As outlined, here is how the integrity statement and exam will be set up. Students will first click on the Agreement and indicate that they have read the integrity statement. They can then proceed to the exam from the agreement page and take the exam.
