This is a regular slide. Use this design for most of your slides. Make sure to use proper in-text citation.

**Subhead 1**

- Paraphrasing is when you put another person's ideas into your own words. When paraphrasing, name the author(s) and include the publication date but you do not have to cite the page number (Plotnick, n.d.).

- Slides should not contain too much information, so as not to be overwhelming, and all sources listed in your slides should be documented in your reference page as well (Fields, n.d., para. 3).
Using Images

This is a regular slide. Make sure you use proper in-text citation when citing images that you find in books, journals, websites, or other sources.
